RESTORING WETLANDS
FOR A SUSTAINABLE FUTURE

SCAN ME!

RESTORE4LIFE SHOWCASES THE REMARKABLE SOCIO-ECONOMIC BENEFITS DERIVED FROM A COMPREHENSIVE AND INTERDISCIPLINARY APPROACH TO RESTORING FRESHWATER AND COASTAL WETLANDS IN THE DANUBE BASIN.

PROJECT GOALS

Develop a Wetland
Restoration Decision
Support System

Support local
revenue and business
activities in restored
ecosystems

Empower
stakeholders and
the community

Support the
implementation
of holistic wetland
restoration solutions

Restore4life is part of the EU Mission: Restore our Ocean and Waters which aims to protect and restore the health of our ocean and waters through research and innovation, citizen engagement and blue investments.

The project engages in 4 demonstration sites and 6 monitoring sites all across the Danube basin to make evident that increased delivery of key ecosystem services, as water and pollutant retention, carbon sequestration and tourism opportunities as well as improved resilience of water-dependent habitats will produce multiple socio-economic synergies that also provide opportunities for sustainable businesses and investments.
