

Restore4Life

RESTORING WETLANDS
FOR A SUSTAINABLE FUTURE

Explore. Play. Restore!

Interactive learning with the Living
Floodplains Digital Toolbox

The Living Floodplains: Learn, Explore, Restore4Life Digital Toolbox is designed to make learning about complex ecological challenges fun and interactive. We offer dedicated resources to enhance educational engagement, including two innovative digital tools.

Wetland Fresk

**BLUE-GREEN
Space4all**

Physical and online game

A collaborative, interactive workshop designed to help participants explore how human activities impact wetland ecosystems (including tidal flats, salt marshes, lagoons, etc.), the consequences of those impacts, and the potential solutions.

Discover
more

A playful computer game where you travel with Otis the Otter along the Danube. Along the way, you will encounter biological, physical, chemical, and social challenges. Answer questions, choose solutions, and improve the Danube step by step – while collecting as many coins as possible.
